**To:** Rae Ann  
**Subject:** Registration Confirmation for Weather on Your Site

Dear Rae Ann,

Thank you for registering for Weather on Your Site. Please print or save this e-mail message for future reference.

Below are detailed instructions for adding the Weather Magnet to your Web site.

Instructions:

-----  
If you have a previous Weather Magnet on your site, please remove any existing code before adding this new code. You will need to copy the single line of code (that you will find below) from this e-mail and paste it in to your HTML Web editor. To ensure you have the entire line of code, verify that it begins and ends with the designated script tags.

**IMPORTANT NOTE:** When you paste the code in to your HTML web editor, please ensure you are pasting it as HTML, not as text. If you paste as text, the Weather Magnet will not appear correctly. Please refer to your HTML editor help files for instructions on how to paste HTML correctly.

<textarea>  
<!----- cut and paste the below code into your HTML editor ----->

```
<script src='http://voap.weather.com/weather/oap/34209?template=GENXH&par=1011648754&unit=0
&key=a4eec1281a0ba604b5843a79c97f72d1'></script>
```

<!----- cut and paste the above code into your HTML editor -----> </textarea>

You may update your user profile or change your product selections at any time by logging in to the weather.com registration system with the following information:
